Meeting Flow and Discussions

ID	Item Description
1	C. Dalusong presided over the meeting at 10:37AM.
2	<u>Program Flow</u> <ul style="list-style-type: none"> - Company Overview c/o C. Dalusong - Introduction of Project Team c/o C. Dalusong and L. Cabanilla - Project Overview and Discussions c/o M. Dalisay (Overall), J. Amemita (Firewall Monitoring and Support Escalations), and F. Estrella (CSOC Facility) - Question and Answer
3	<u>Discussions</u> <ul style="list-style-type: none"> - High - Critical Risks are of paramount importance and must be responded with an incident report alongside the recommendations to mitigate/remediate the incident within the agreed upon response time and escalated to the provided channels. - For the CSOC Facility, M. Guillermo requested the team to compile best practices for a standard CSOC Facility to ensure security of the facility. - M. Guillermo also requested the specific tasks of the onsite engineer. <ul style="list-style-type: none"> o Main tasks of the onsite engineer will be as follows: <ul style="list-style-type: none"> ▪ Technical Configuration and Policy Change course through JIRA ticketing ▪ Reporting for Firewall Monitoring (to be discussed further with principal) ▪ 8x5 Onsite Engineer will be the primary onsite escalation for configurations, implementation, etc. ▪ There will be an alternate engineer in case the dedicated onsite engineer will be absent. - Part of the requirements will be the submission of as-built documentation which will include the configuration and implementation, policies, and final CSOC Layout. - Major changes from the previous ones: <ul style="list-style-type: none"> o Added features included: Hardware, Firewall Monitoring, Phishing Simulation, and CSOC - Last Email Security Health Check was conducted last April and conducted at least twice a year. - For the Severity 1, initial response time does not have local time, so the engineer is expected to respond anytime. - For critical incidents, the MDR Team will have an hourly update. and will provide an incident report in less than 24 hours. A complete and final incident report will be provided in the next two (2) days. - For firewall implementation, Will include the sizing for the log ingestion, EPS, logs per week/day and budget (Radenta) - Determine access provisioning especially for the firewall, for those who will be on duty for both the 24x7 and 8x5 onsite. - DLP implementation and Investigation correlation to Email Activities (User Compromise, etc) should be part of the implementation (pending on DBP side).
4	The meeting was adjourned at 11:56AM.
