1. Migration Report

1.1 Executive Summary

The KCF API Microsoft 365 migration project aimed to consolidate user mailboxes from two Google Workspace tenants (kcfapi.com and kofc.org.ph) and an On-Premises Exchange 2019 server into a single Microsoft 365 tenant. The migration was executed using Microsoft's native Google Workspace migration tool and PST import for on-premises data. All mailboxes were migrated successfully, and mailflow has been validated internally and externally.

1.2 Scope

Included: User mailboxes (emails, calendars, contacts).

Excluded: Google Drive, shared mailboxes, distribution groups.

1.3 Timeline & Milestones

- September 12–14, 2025: Initial migration activities (domain verification, kcfapi.com GWS migration, PST import).
- September 19, 2025: Migration of kofc.org.ph users.
- Post-migration: Mailflow validation, UAT, sign-off.

1.4 Key Achievements

- Verified kcfapi.com domain in Microsoft 365 using Cloudflare DNS.
- Enabled required APIs and created service accounts in Google Admin.
- Created migration batches and migrated users from kcfapi.com GWS.
- Migrated kofc.org.ph and kcfapi.com GWS users into M365.
- Conducted inbound and outbound mailflow testing.
