CHANGE REQUEST DOCUMENT (CRD)

Project Name: Procurement of Cloud Subscription for eClaims Submission

July – August

Change Request No.: REQ-001

1. Change Request Details

Requested By: Nise Legaspi
Email / Contact: legaspin@philhealth.gov.ph
Type of Change: Enhancement
System: API
Ticket Item: Queue Process

2. Description of the Requested Change

Rework the Queue process to perform the following:

1. For all process JSON calls (these are the APIs that allow the upload of certain documents) to remove the condition of passing back the overall status. The APIS should only return the Transaction ID and the queue status. all succeeding queue process / calls are to use the validate method APIS.

3. Impact Assessment

3.1 Impact on Schedule

- Reported Date: August 11, 2025
- Target End Date: August 14, 2025
- Additional Days Required: 3 days
- Priority: High

4. Remarks

This request is considered a request / enhancement since the conditions of the process needs change. However, it is necessary that this is fixed to allow more fluid transaction processing for PhilHealth's service providers.

U-2BC CBC Corporate Center
724 Shaw Blvd. Wack Wack
Mandaluyong City

(02)-85357801
info@radenta.com
www.radenta.com

If the condition is not performed (at the current) health facilities can still process the conditions however will have to wait for the process to validate and process before returning an output, giving an impression of a slow performing API.

Change Request No.: REQ-002

1. Change Request Details

Requested By: Nise Legaspi
Email / Contact: legaspin@philhealth.gov.ph
Type of Change: New Request
System: API
Ticket Item: Queue Process

2. Description of the Requested Change

Rework the Queue process to perform the following:

2. Add an additional handling / condition to allow retriggers for json call that had failed initially (failed due to different functions / conditions such as: invalid xml , file size exceeded, authentication failure, internet failure, service downtime for PECWS)
 - a. to create another API to " cancel" transaction - the cancel transaction can be triggered manually by calling the ID or automated every hour.
 - b. the cancel transaction has a limit window of 24 hours , in which if the transaction is still failed, the condition will retain failed /closed with error. the validate call API should be able to return the existing status

3. Impact Assessment

3.1 Impact on Schedule

- Reported Date: --
- Target End Date: --
- Additional Days Required: 5 days
- Priority: High

4. Remarks

U-2BC CBC Corporate Center
724 Shaw Blvd. Wack Wack
Mandaluyong City

(02)-85357801
info@radenta.com
www.radenta.com

The request to add an additional handling was not discussed prior and it is in the assumption (based on process details provided) that there will be no means to cancel the API. However, this is a mentioned requirement by PHIC that will allow them to further control the transactions as such.

without cancellation, the APIS will have no capability to retry the transaction "automatically" in an event of an unknown error, such as intermittent internet connect. it will return " gateway timeout" or other validation errors as such.

Change Request No.: REQ-003

1. Change Request Details

Requested By: Manny Manlangit
Email / Contact: manlangitm@philhealth.gov.ph
Type of Change: New Request
System: API
Ticket Item: Encryption / Decryption

2. Description of the Requested Change

Perform decryption encryption process during the data upload of files.
1. to add a decryptionkey after validation and. Before saving to storage
2. to encrypt the data using the provided public key by PHIC

3. Impact Assessment

3.1 Impact on Schedule

- Reported Date: --
- Target End Date: --
- Additional Days Required: 10 days
- Priority: Medium

4. Remarks

This ticket is requested by Manny to offload the decryption process to the frontline API service. As per Manny, it Is in the best interest to decrypt to keep it as a standard similar to the existing PECWS

U-2BC CBC Corporate Center
724 Shaw Blvd. Wack Wack
Mandaluyong City

(02)-85357801
info@radenta.com
www.radenta.com

Change Request No.: REQ-004

1. Change Request Details

Requested By: Vanessa Cabading
Email / Contact: cabadingv@philhealth.gov.ph
Type of Change: New Request
System: API
Ticket Item: Worker Process

2. Description of the Requested Change

1. Determine/ add worker process to accommodate sizing of 1000 files per day upload as requested by PHIC.
2. Perform benchmark to simulate the load

3. Impact Assessment

3.1 Impact on Schedule

- Reported Date: --
- Target End Date: --
- Additional Days Required: 5 days
- Priority: Medium

4. Remarks

This is a discussion at this point since there is no mentioned benchmark of worker queue processes determined at start. Explicitly mentioned at the start that this is necessary to avoid reconfigurations.

Change Request No.: REQ-005

1. Change Request Details

Requested By: Nise Legaspi
Email / Contact: legaspin@philhealth.gov.ph
Type of Change: Enhancement
System: Dashboard / API

U-2BC CBC Corporate Center
724 Shaw Blvd. Wack Wack
Mandaluyong City

(02)-85357801
info@radenta.com
www.radenta.com

Ticket Item: Revised Dashboard – Facility

2. Description of the Requested Change

Update the Philhealth web application dashboard to:

- A. Per Facility Dashboard – Enhancements Required
 - a. File Submission Summary
 - i. Total number of files submitted per facility
 - ii. Number of successful submissions
 - iii. Number of failed (negative) submissions
 - b. Successful Submission Details
 - i. Clickable/expandable view showing:
 - 1. Transaction Number or Reference Number
 - c. File Details (First Column Breakdown)
 - i. File Type: ESOA, PDF, CF4, or CF5
 - ii. Failure Reason: Display specific reason for upload failure (if applicable)
 - d. File Status Categories
 - i. Pending
 - ii. Submitted

3. Impact Assessment

3.1 Impact on Schedule

- Reported Date: August 11, 2025
- Target End Date: August 29, 2025
- Additional Days Required: 5 days
- Priority: Medium

4. Remarks

These are part of the go live enhancements requests to put more bearing and structure to the bundled web application service. This request, however is technically a new enhancement since we have mentioned that to PHIC on what they want to do with the platform.
